

APRIL PROOFS RELEASE

JURA-BETAIL, YOUR MONTBELIARDE SUPPLIER

A change of rolling base, a handful of new bulls, the 2 number ones of the breed; Jura-Betail gives you here the highlights of this new proof release :

✓ THE CHANGE OF ROLLING BASE

As every year at the same period, the evolution of rolling base occurs. It reflects the genetic improvement of the Montbeliarde breed.

This year it is as follows:

ISU	INEL	MILK	TYPE	UDDER	BODY
-4 pts	-3 pts	-45 kg	-1 pt	-1 pt	0 pt

✓ OUR BULLS :

For the 7th proof release, Jura-Betail maintains his leadership position giving you the number 1 of the breed. After **HARPON JB**, (from April 2015 to June 2016) who is today the number 2, **JORDREN JB** is definitely the one representing the top of the breed.

The edition of JuraExpo has allowed to some of you to discover the first of our bulls' daughters. For instance, we had the chance to discover **GALPAGE JB's** daughters. Shortly after their arrival, they already stand out (Jacacée, best udder). With his *Grazing* profile, **HELLEAN JB** is a well-balanced dairy sire (milk and components) you can use on heifers, he also gives cows easy to manage with good udders. **GRESIL JB**, VALFIN JB's son, has a *Healthy* profile with good udders. You can use not only on cows but also on heifers. He is really adapted for your crossbreeding programs.

✓ IF YOU LOOK FOR :

Within young bulls:

- Milk: **JOSTIK JB** (Milk +1 112), **HARPON JB** (Milk +955) and **HEPTOL JB** (Milk +878).
