

APRIL PROOFS RELEASE

JURA-BETAIL, YOUR MONTBELIARDE SUPPLIER

Time for our rolling base, few first daughters and still some number 1! Jura-Betail gives you here the highlights of this new proof release :

✓ **THE CHANGE OF ROLLING BASE**

As every year at the same period, the evolution of rolling base occurs. It reflects the genetic improvement of the Montbeliarde breed. **This year it is as follows:**

ISU	INEL	MILK	TYPE	UDDER	BODY
-3 pts	-2 pts	-32 kg	-1 pt	-1 pt	0 pt

✓ **OUR BULLS :**

Within the Top10 of the breed, Jura-Betail offers you 3 sires including **JORDREN JB**, with 160 points of ISU, which confirms its dairy profile and especially with a remarkable combination of the content. And **MAULEON JB** which offers a very high-quality udder index along with milk and exceptional functional qualities.

The edition of JuraExpo allowed for some of you to enjoy and discover the first of our bulls' daughters. For example, we had the chance to look at **HOLDING JB**'s daughters which, just out, are already noticed by winning awards (Judicieuse, best udder and Lyzy, champion 2018). Despite a considerable loss of milk, which is reflected on his ISU, HOLDING JB wins 3 points on his Udder index and maintains his functional abilities (udder health, longevity and reproduction). **HARPON JB**, within the Top10 of the breed, with his first 10 daughters in his index improves in both quantity and quality of the milk and maintains his type profile.
