

MONTBELIARDE JUNE PROOFS RELEASE

JURA BÉTAIL OFFER

Jura-Bétail offers it's:

10 new genomic sires with an average of 143 points of ISU, +838 kg of Milk, 115 in Total Type, 112 in Udder and 9 different sires.

Within the TOP5 of the Montbeliarde breed for ISU (JORDREN JB @157), for Milk (NORTUG JB @+1,198kg), for Type (MAXIMO JB @132) and for Udder (MAULEON JB @129).

ITACHI JB and MOIRON JB

The first **ITACHI JB**'s daughters had amazingly performed last March at Dole Expo at the progenies presentation. Now with about a hundred new daughters recorded in his proof, **ITACHI JB** confirms his place and even increased his assets:

Production: 149 points of ISU (+8 points), +757 kg of milk (+300 kg) with +0.4 in Protein and +1.9 in Fat.

Functional traits: +0.6 in somatic cells, +0.9 in reproduction and +0.2 in longevity.

Type: what makes the difference with this sire is the quality of his legs (115) mainly thanks to fine bones.

Don't miss that great sire!!

ITACHI JB

Lisette, ITACHI JB's daughter

One of his sons is **MOIRON JB** (Itachi jb x Diablo jb): #1 in ISU in our new genomic offer and within the TOP10 ISU of the Montbeliarde breed with 155 points of ISU.

MOIRON JB is born at the GAEC des Bouviers in Jura. Just like his sire, **MOIRON JB** has a very balanced dairy profile: +542 kg of milk with +1.7 in Protein and +2.6 in Fat. Along this the Type is also great with a synthesis type index at 113 points (12 points is 1 standard deviation) with 115 in Body capacity and 108 in udder. His functional traits are all good but he will definitely give very easy-to-manage cows with milking speed at 112 and temperament at 123.

FLIPEX JB, HARPON JB, MIZUNO JB and MEMORY JB

Within the proven sires, **FLIPEX JB** maintains his profile. With 342 recorded, his ISU is ranked at 141 points and he is combining production and type:

+550 kg of milk with +1.6 Protein and 0.4 Fat; 115 in total type and 121 in udder.

FLIPEX JB his really giving his profile to all its progenies, males and females, and you will discover one of his son next Fall.

Paradis, FLIPEX JB's daughter =>

One of his most famous sons is actually **HARPON JB**.

Now with 47 daughters recorded in his proof, **HARPON JB** is now part of the proven sires offer.

Still has a great dairy potential with +791 kg of milk, +0.9 Protein and 1.9 Fat.

HARPON JB has also an amazing type with 116 in total type, 111 in Height, 111 in chest width and 123 body depth.

<= Juvintus, HARPON JB's daughter

HARPON JB is now one of our sires of son and gives very promising results with 9 new sons released this June with an ISU at more than 133 points.

MIZUNO JB (Harpon jb x Appolo jb x Micmac) has an amazing dairy profile: +1,081 kg of milk and +1 in Fat. With an ISU ranked at 148 points, he's part of the TOP50 of the breed. His type is very good with 111 in body capacity, 103 in rump, 109 in feet&legs and 110 in udder.

One of his advantage: the lowest inbreeding rate!

MEMORY JB (Harpon jb x Brink x Redon) is born at the GAEC le Gargotteau, in western part of France. His ISU ranked at 143 points gives the value of this bull:

Production: +739 kg of milk with +0.3 Protein and +1.3 Fat.

Type: With a total type at 120, **MEMORY JB** is the best Harpon jb's son on that criterion. With a body capacity at 122, **MEMORY JB** is very improver in height (113), width (112) and body and chest depth (121). On the rump trait, here again **MEMORY JB** is bringing size with 114 in length and 109 in width at thurls. The udder is as well amazing with a synthesis score at 113: very good ligament (111), very good teat orientation (117) and a very good rear udder: 107 in height and 117 in width.
